

DESERET POWER
ELECTRIC COOPERATIVE

Quantitative Analyst Intern

Deseret Power is accepting resumes for the position of **Quantitative Analyst Intern**. This position is in Deseret's corporate offices in South Jordan, Utah (suburb of Salt Lake City) and may require occasional travel to offsite meetings. Primary responsibilities will be to perform:

- Load forecasting
- Energy market analysis
- Database development/dataset management
- Data visualization and reporting
- Settlements
- Reporting

Qualified applicants should have course experience in economics, statistics, operations research, and some computer programming. In addition, the successful candidate will be familiar with VB/VBA, Python, SQL, and R (or comparable programming languages and analytical tools) along with Microsoft Office.

This internship is a compensated position that is expected to provide the successful candidate with valuable experience in the energy industry over the first half of 2023.

Deseret Power is a not-for-profit electric utility generation and transmission cooperative that supplies power to rural communities throughout Utah, Wyoming, Colorado, Arizona, and Nevada. Deseret Power actively trades in Western wholesale electric markets.

Submit online resume to scornia@deseretpower.com. All responses should be emailed on or before November 1, 2022.

Deseret Power is an Equal Opportunity Employer.
